

From the number #1 designer of pitched percussion instruments

Handmade in the USA of 100% birch. We designed these Cajons specifically with tradition in mind, based on the traditional Cajons from Peru. These drums are constructed from 1/2" hand-picked, 11-layer Baltic birch with a 1/8" hand-picked Baltic birch playing surface. To create strength and tonal quality, all the wood is glued together using a high-strength wood glue. Seven screws are added to the top of the playing surface to create a truly authentic sound and to allow for slight tonal adjustments on the part of the player. Each drum is hand-sanded and coated with a polycrylic, protective finish that will protect your drum for years.

El Maestro "The Master" \$159

CAJ1100 19³/₄" H x 13³/₄" W x 10¹/₄" D

This drum was designed by a master cajon builder and player. Due to the shallowness of the drum, the sound is characterized by a clear soft tone, perfect for recording or indoor performance.

El Pisco "City in Peru" \$159

CAJ1300 19⁵/₈" H x 12¹/₂" W x 11¹/₄" D

This drum is designed to be true and authentic to the drums heard and used in the city of the Cajon's birthplace, Pisco, Peru. The drum's sound is characterized by a large range of volume and a colorful authentic slap/pop sound that can be heard in traditional Cajons.

El Presidente "The President" \$159

CAJ1200 19³/₄" H x 13¹/₄" W x 13¹/₈" D

This drum is designed to be the working man's drum. It is a hybrid of our **El Maestro** and **El Pisco** drums — a true and authentic slap/pop sound with good volume and a clear tone.

From the number #1 designer of pitched percussion instruments

Handmade in the USA. We designed these Cajons specifically with tradition in mind, based on the traditional Cajons from Peru. To create strength and tonal quality, the wood is assembled using a high strength wood glue. Each drum is hand-sanded and coated with a polycrylic, protective finish that will protect your drum for years. **Snare wires are added in a precise place to provide balance and exception tonal response.**

El Guapo "The Handsome"..... \$400

CAJ1500 20¼" H x 14" W x 13¼" D

This drum was designed to be the top of the line snare drum we produce. The drum's sound can be characterized by a very deep rich warm bass yet balanced enough to produce a distinct high-range snare sound. The drum is constructed of ¾" hand-picked **solid mahogany** with a 1/8" hand-picked mahogany playing surface.

El Jefe "The Boss"..... \$189

CAJ1400 19¾" H x 14" W x 13⅛" D

This drum is designed to be a high-quality but less expensive counterpart to **El Guapo**. The drum is constructed out of 1/2" hand-picked 11-layer Baltic birch with a 1/4" hand-picked Baltic birch playing surface. The drum's sound is characterized by a deep booming bass yet with enough balance to produce a distinct high range snare sound.

La Piba "The Kid".....\$85

CAJ1000 13¼" H x 8¾" W x 8½" D

The smaller version of El Jefe, this drum was designed for the budding musician. Exceptionally responsive, La Piba definitely punches above its weight. It is diminutive in nature but with enough volume to play along with any of our larger drums. It features enough balance to produce a distinct high range snare sound. Snare wires are precisely placed to provide balance and exception tonal response. This creates a truly authentic sound and allows for slight tonal adjustments on the part of the player.

Pedal

Pedal Cajon \$359

#CAJ1600 n19³/₄" H x 14" W x 13¹/₈" D

The Malmark Pedal Cajon is the first of its kind on the market. A traditional and snare cajon in one with unparalleled functionality. This creates almost an entirely new instrument. The pedal feature allows the player to turn on and off the snare wires in real time, instantaneously. Additionally, it allows the player to play the snare wires rhythmically. This instrument is bound to change how the instrument is played.

Snare wires are added in the precise place to provide balance and exceptional tonal response. The snare wires are actuated by a beautifully machined high-grade aluminum foot pedal. The pedal is placed on the left side and is easily adjustable for player preference. This is meant to mimic the feel of a drum kit where the high hat is played with the left foot. Add a bass pedal attachment and have a complete drum kit in one. The snare wires through a cam locking system are also able to be locked if the player so desires.

The internal mechanisms are made of high grade steel and aluminum. The design incorporates high grade tension bands for long lasting use.

The cajon sound can be characterized by a deep booming bass yet with enough balance to produce a distinct high range snare sound. The pedal cajon comes with an internal damper bar so that when the snares are turned off there is no residual snare rattle. In traditional mode just the pure wood tone and resonance comes through. This feature makes the Malmark Pedal Cajon completely micable in either snare or traditional mode.
